How are you feeling about the state of the world and our options to change things?

3 tangles

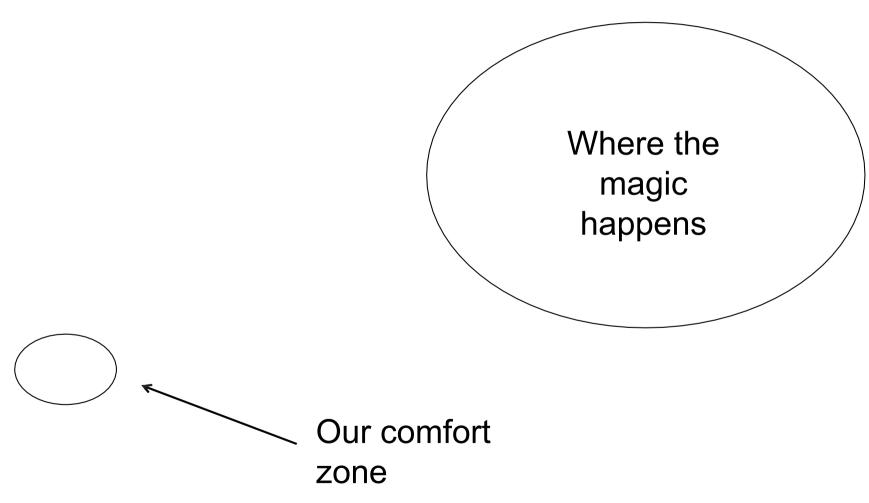

global

conceptual

visceral

What has to change? We do

Slide from Marco Lambertini, WWF Green Week, Brussels. June 1014 © Nigel Dickinson / WWF-Canon

Our comfort zones help us cope with our visceral tangle

This works without being noticed, by cognitive dissonance

Hence 40+ years of ideas/ plans/actions that don't cope with the global tangle We can cope with the global tangle as a whole system

The concepts lie outside our comfort zones; they will be uncomfortable

Our feelings can still guide us

KEEP OR TRANSMUTE EVERYTHING

A positive future: still a tangle of complexity

But set up to solve rather than cause problems

That's a big comfort zone!

Thank you!!
